

Rx STOP LOSS INSURANCE FOR MUNICIPALITIES

Public and government entities, municipalities and school districts may face unique constraints in funding their healthcare coverage. Many have migrated to self-funding their health plans to help control costs. Like private employers, public entities have the ability to negotiate their PBM contract, collect rebates and implement value-based programs while providing valuable coverage to their employees and dependents.

REINFORCE YOUR BENEFIT PLAN

Although public entities have positioned themselves to reap the rewards of self-funding, a catastrophic prescription drug claim could jeopardize the plan and put taxpayers dollars at risk. Public entities limited cash flow options make protection from increased member utilization and high cost drugs a valuable consideration. Prescription Drug Stop Loss Coverage can help protect the integrity and assets of the benefit plan.
